About

As a designer turned engineer I have valuable skills on both sides of the frontend process. I can develop client-side architectures and craft designs with modern principles while working on a distributed multi-disciplinary team.

Skills

Vue / Nuxt	React / Gatsby
HTML / CSS	Javascript
Cypress	Plus any mentioned below

Experience

JUNE 2018 - PRESENT

Design Collective, San Francisco CA - *Frontend Engineer*

- Implemented end-to-end frontend testing with Cypress for all user-flows.
- Converted frontend to Tailwind CSS, replacing old SASS library and reducing bundle size.
- Implemented high-priority user requests for bug fixes and enhancements.

JANUARY 2019 - JULY 2019

Third Wave Digital, Macon GA - *Junior Developer*

- Custom tool development for proprietary CMS with ColdFusion, MySQL, and jQuery
- Designed and built landing pages using HTML, CSS, and jQuery
- Answered and responded to support emails and phone calls

Project

ColtXP - ColtXP.com is a platform built using NuxtJS, Tailwind CSS, and Google's Firebase/Firestore. What I'm developing is a space where junior and senior developers can connect to pair, learn, and grow by working through open-source issues and projects together in a mutually beneficial relationship. The seniors can move their projects forward and the juniors can build their resume.

Education

DeVry University - *Associate's of Web & Graphic Design*: **Graduated April 2016**
